PROJECTS

Email Software   Github
Tech stack : **HTML | JAVA | MySQL**
- This Email Software project gave me a real time experience of how an email software actually works.
- It includes **Inbox, SentBox, ComposeMail, Login ,Logout** etc...features,they are immersed in my **journey**, **skills**, and **projects**.

My Portfolio   Github
Tech stack : **HTML | CSS | JAVASCRIPT**
- This portfolio project is a digital mirror which is reflecting my skills and creativity.
- The profile section introduces me as a protagonist, and as visitors scroll through the sections, they are immersed in my **journey**, **skills**, and **projects**.
- The portfolio truly shines in the Projects section, where visitors can have a quick glance of my **hosted project with Live Demo**.

Amazon Clone Page   Github
Tech stack: **HTML | CSS**
- Developed a **frontend clone** of the Amazon website.
- This project improved my skills in web development by helping me understand the importance of **responsive design** and **user interface** principles.
